Research Project - IT4010 Ethical Analysis Report

Group ID:

Project Title:

	Identification and Analysis
Data Privacy Concerns	Discuss concerns related to data privacy. Ex: Ensuring that all data used in the project is anonymized and that informed consent has been obtained from data subjects where necessary.
Data Security	Mention data protection measures. Ex: Implementing robust security protocols to prevent unauthorized access to sensitive data.
Bias and Fairness	Identify potential biases in data or algorithms. Ex: Assessing the data for inherent biases that could lead to unfair or discriminatory outcomes in the predictive model.
Transparency and Accountability	Consider the transparency of your methods and accountability for outcomes. Ex: Maintaining clear documentation of methodologies and being accountable for the ethical implications of the research findings.
Impact on Stakeholders	Evaluate how different stakeholders might be affected. Ex: Analyzing how the predictive model's outcomes could impact the privacy, autonomy, and rights of the individuals whose data is being used.
